

NEW CERTIFICATION STANDARD SEMINAR –

ISO 22301:2012

Business Continuity Management Systems

Enhance recovery capability from disruptive incidents

All organizations, no matter big or small, are subjected to unforeseen incidents. Industrial accidents, financial crisis, IT system breakdown, natural disasters would no wonder pose the destructive impact on corporate. Businesses realize that they need a comprehensive and robust business continuity plan, so as to demonstrate its crisis management ability to all its stakeholders.

The new ISO 22301 - Business Continuity Management (BCM) Systems emphasizes the need for a well-defined incident response structure. This ensures that when incidents occur, responses are escalated in a timely manner and people are empowered to take the necessary actions effectively.

The seminar will provide you the worldwide insights of BCM, as well as the prospective steps to obtain ISO 22301 certification.
