Technical Session- Organizational HSE Learning

Strengthening OSH professional competencies

Prof Vincent Ho

BS (Hons), MS, PhD, MBA, CEng, PE, RPE, CSP, CFIOSH, FIMechE, FCILT, FHKIE, SMS, POST

President Institution of Occupational Safety and Health

What is IOSH?

Professional body

A not for profit organisation holding a Royal Charter that exists for the public good

Thought leader

Underpinned by research, expertise and understanding around occupational safety and health

Membership organisation

Supporting a global network of 48,000 members in 130 countries

Enabler

Helping organisations around the world to excel in safety and health. 180,000 delegates in over 70 countries trained each year

IOSH – branches and groups

Now 48,000 members, in over 120 countries

IOSH – what we stand for

Our vision

A safe and healthy world of work

Six Priorities

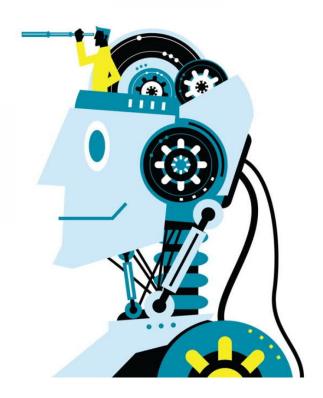

Our strategy

Workplace changes

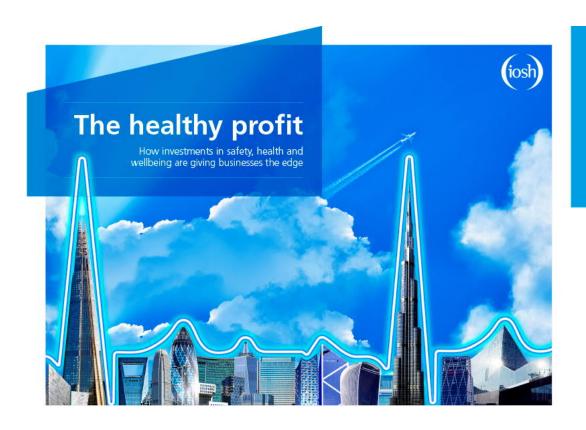

The impact of change on the health and safety at work agenda

- Why is the world changing?
 - Demographic changes
 - Technological changes
 - Organisational changes
 - Socio-political changes
 - Gig Economy
 - Zero-hours contracts
 - Flexible working
 - Working from home/remotely
 - Deferred retirement

The healthy profit

Our call to action to business

- Report highlights the investments being made by forward-thinking organisations
- An IOSH-commissioned survey found barriers exist for many businesses
- Investment in the safety and health of a workforce should be a core strategic aim
- Transparency and openness in reporting on OSH performance

Extreme choices

This is not a "catch-22" situation

2.78 million

work-related deaths occur every year worldwide, over **380,000** are fatal accidents, **2.4 million** the result of occupational diseases, including cancer

(International Labour Organisation et al. 2017)

There is a return of **2.2 euros** for every one euro invested in occupational safety and health, according to the International Social Security Association

(calculating the international return on prevention or companies – Final report 2013, ISSA)

What concerns an organisational Leader?

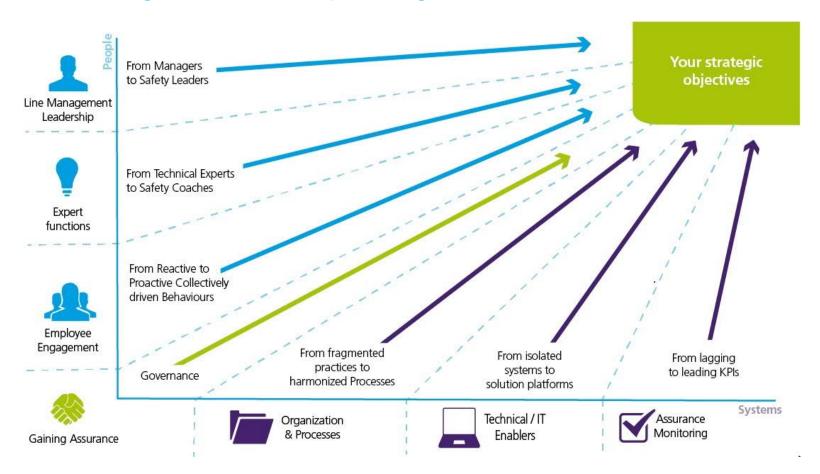

- Strategic environment
- Leadership
- Culture and Engagement
- Brand reputation
- Organisational resilience
- Financial performance
- Governance

Occupational Safety and Health has a key role to play in all of these, right through the organisation

But it needs to be impactful and integrated not simply added on

Real-world challenges

How are organisations responding?

Impact on the profession

What's expected of the OSH Professional?

What OSH Professionals do can be quite broad and it's still widening....

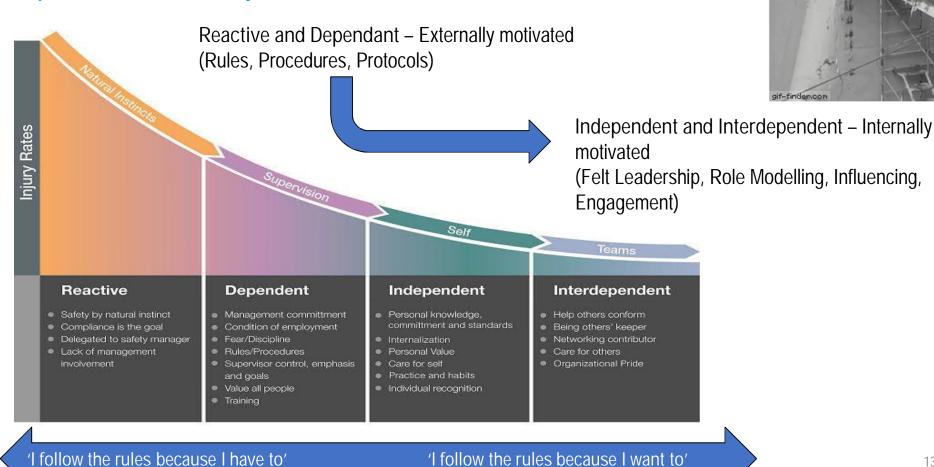

- Traditional fields of responsibility
 - Safety
 - Occupational Health
 - Occupational Hygiene
 - Fire
 - Environment
 - Quality
- Evolving fields of responsibility
 - Wellness including mental health
 - Psychosocial risks
 - Corporate social responsibility
 - Safeguarding
 - Sustainability
 - Human Capital

The future for OSH professionals

Our research says... ...so OSH professionals need... ...health and safety is becoming more complex ...a breadth of knowledge and flexibility. and spans many other disciplines... ...OSH is becoming more reliant on science and ...to be innovative and agile. technology... ...organisations want improved productivity and ...to look at simplification, efficiencies and adaptability... innovation. ...OSH professionals need to work as global ...to understand different cultures and practices, citizens... as well as technical legislation. .organisations need OSH professionals to work ...strategic and influencing skills. as equal partners in the boardroom... ...organisations need OSH professionals to ...to be solution providers, not business blockers. deliver value to the business... ...there is a talent shortage for those who can ...to take up the opportunities. deliver "world-class" OSH...

Where you will be going

Depends on where you are

Technical, core and behavioural themes

IOSH focus on competencies

- Core competencies support the organisation's values and mission.
 They will usually apply to all jobs in the organisation and to include leadership and management
- Behavioural competencies soft skills that reflect personal behaviours and attributes
- Technical or job specific competencies apply to certain roles or a 'family' or 'group' within the organisation. These competencies outline any technical expertise required and assess the depth and breadth of that skill and knowledge.
- 'Meta' competencies relate to the recruitment of high potential individuals who the organisation would like to promote and develop

Enhancing the profession

How IOSH is supporting professional development

Some examples of new initiatives

- Improvements this year to our CPD (continuing professional development) system
- Creating new technical guides and running CPD courses
- A careers hub
- Student membership
- Future Leaders Community for new and aspiring OSH professionals
- Events designed for professionals at every level
- A new qualification with a focus on technical and business skills

Training and skills courses

The future of our profession

NCFE IOSH Level 3 Certificate in Safety and Health for Business

Summary

A changing world of work

Organisations are now responding

Leading to changes in OSH role

More collaborative working

OSH professionals need to build competencies

to enhance the profession
